

AYUSH DESAI

Surat, Gujarat | +919624486046 | aayushdesai1020@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with expertise in MERN stack and TypeScript, specializing in backend development. Experienced in building scalable web applications using modern frameworks including NestJS and Express.js. Proficient in database design, RESTful API development, and cloud services integration. Passionate about creating efficient, maintainable code with a focus on performance optimization.

EDUCATION

Sarvajani College of Engineering and Technology, Surat, Gujarat

Graduation 2025

- Pursuing B.Tech in Computer Engineering (CGPA 8.9)
- Relevant Coursework: Data Structures and Algorithms, Web Development, Machine Learning, DBMS, OOP

Bhakti International School, Surat, Gujarat

2021

- Class XII (Science) - 90% | Class X - 91%

SKILLS

- Programming Languages: JavaScript, TypeScript, Python, C, Java, SQL
- Web Technologies: Node.js, Express.js, NestJS, React.js, Tailwind CSS, RESTful APIs, GraphQL
- Databases: MongoDB, PostgreSQL, MS SQL, Redis,
- Tools: Git, Github, Postman, Docker, AWS S3, EC2

EXPERIENCE

Full Stack (MERN) Developer Intern - Realloc Infotech Pvt Ltd

Jan 2025

- Contributed to a live healthcare application by developing new APIs and enhancing existing features using Express.js and TypeScript
- Debugged and optimized backend functionality in a production environment
- Worked with senior developers to streamline database queries, improving response times
- Gained valuable experience in production deployment workflows, code review processes, and working with legacy code in an enterprise environment

PROJECTS

Podcast Collaboration Platform - Node.js, Express, WebRTC, React, Socket.IO - [Github](#)

- Built a real-time video conferencing system with collaborative whiteboard for podcast sessions
- Implemented YouTube live streaming integration for one-click broadcasting
- Created scalable backend architecture for handling concurrent video and data streams

AI Image Generation Web Application – MERN Stack, JWT, OAuth 2.0 - [Github](#)

- Developed full-stack application with email verification, Google OAuth, and user collections
- Built RESTful APIs for image generation, prompt enhancement, and user management
- Created responsive interface with React and modern TailwindCSS

Restaurant Management System - NestJS, TypeScript, TypeORM, PostgreSQL - [Github](#)

- Developed a backend-focused restaurant management application using NestJS framework and TypeScript
- Implemented TypeORM for efficient database operations and entity relationships
- Integrated AWS S3 for storing and managing restaurant images and menu assets
- Created RESTful endpoints for inventory management, menu items, and order processing
- Designed modular architecture following SOLID principles and dependency injection

Automated CI/CD Pipeline - GitHub Webhooks, Docker, Bash, EC2 - [Github](#)

- Developed a webhook-based automation system to rebuild Docker images and deploy updated containers on server upon every GitHub push event
